FOR IMMEDIATE RELEASE:

Nisum's new white paper presents five engagement models to use Agile for a globally distributed team at any level of maturity.

The new white paper titled "Agile Models for Global Teams" will address the advantages, challenges, and best practice of five engagement models to use with distributed Agile teams focusing on the three-dimensional approach of people, process and tools used to implement these models.

San Francisco, CA – Nisum's new white paper features five models targeted at small or enterprise companies seeking to implement agile for globally distributed teams at any level of agile maturity. Nisum's research division has identified advantages, challenges, and best practices including a propriety concept at the highest maturity level called Agile Next Door©

Download a complimentary copy of the white paper, "Agile Models for Global Teams" on www.nisum.com.

Shami Ahuja, Director of Nisum's Agile Practice remarks, "Nisum has well rounded experience in helping companies transform to new Agile and Lean methodologies. We start with the mindset, culture and processes that lead to successful agile realization with lean or agile teams."
